## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The IDS submitted 2 June 2008 has been considered by the Examiner.

### ***Claim Rejections - 35 USC § 102 and 35 USC § 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Dupont et al., U.S. Patent 5,877,103.

Dupont et al. disclose a glass having overlapping ranges of the components as recited in claims 1-11. See Abstract and column 1, lines 16-28 and column 3, lines 30-38. The compositional ranges of Dupont et al. are sufficiently specific to anticipate the glass as recited in claims 1-11. See MPEP 2131.03.

Art Unit: 1793

SiO <sub>2</sub>	60 to 75%
Na <sub>2</sub> O	10 to 20%
CaO	0 to 16%
K <sub>2</sub> O	0 to 10%
MgO	0 to 10%
Al <sub>2</sub> O <sub>3</sub>	0 to 5%
BaO	0 to 2%
BaO + CaO + MgO	10 to 20%
K <sub>2</sub> O + Na <sub>2</sub> O	10 to 20%

  

Fe <sub>2</sub> O <sub>3</sub>	0.75 to 1.80%
Co	0.0040 to 0.0180%
Se	0.0003 to 0.0040%
Cr <sub>2</sub> O <sub>3</sub>	0.0010 to 0.0100%

Dupont et al. disclose TE4 which anticipates the TE4 and a selectivity of claim 1 and 11. See Abstract and column 3, lines 39-43.

However, Dupont et al. does not disclose any examples that anticipate claims 1-11. Dupont et al. does not teach the LTA4 as claimed in claims 1 and 10.

Therefore, in the alternative to the § 102 rejection the reference discloses a composition that has overlapping ranges of components with the instant claimed glass, and overlapping ranges have been held to establish *prima facie* obviousness. See MPEP 2144.05. The claims are considered anticipated or in the alternative the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time of the invention to have selected the overlapping portion of the range disclosed by the prior art because overlapping ranges have been held to be a *prima facie* case of obvious, see *In re Malagari*, 182 U.S.P.Q 549.

One of ordinary skill in the art would expect that a glass with overlapping compositional ranges would have the properties recited in claims 1 and 10. Products of identical composition may not have mutually exclusive properties. *In re Spada* 15 USPQ2d 1655,1658 (Fed. Circ. 1990).
